

Respondus LockDown Browser and Monitor (Faculty)

Jana Swartwood

9/17/2020

Definitions

- **Respondus LockDown Browser**

- Creates an environment on the computer/iPad where all screens are locked and inaccessible while the exam is being taken in D2L.
- Does not flag or prevent student from using other devices.
- Best used alone for classroom testing where students are otherwise proctored by a human.

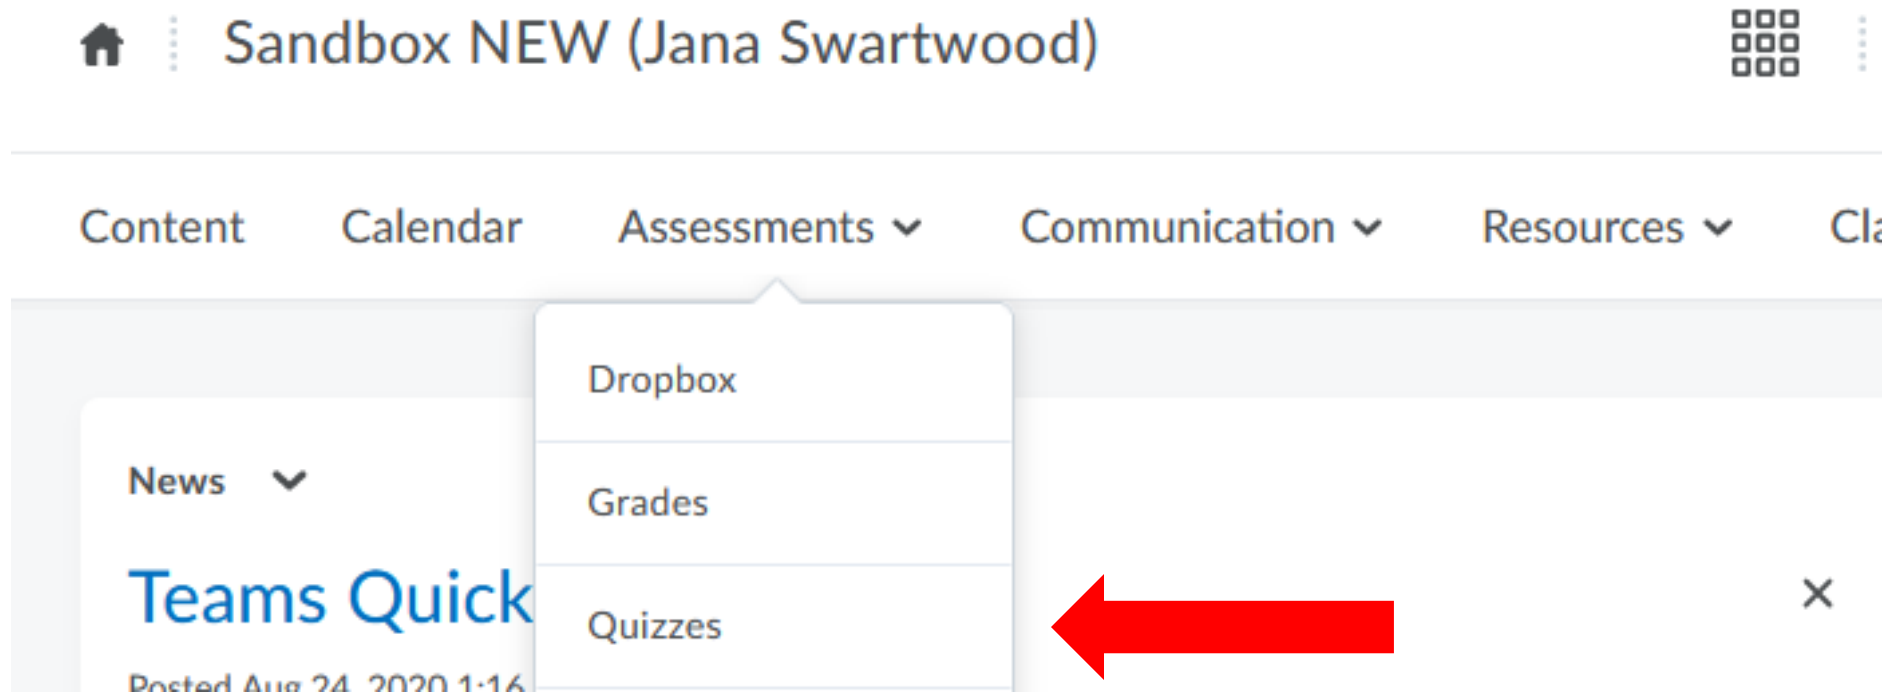

- **Respondus Monitor**

- Provides AI-based webcam proctoring for remote students.
- Requires webcam check and facial detection check before the student begins.
- Optional items = additional instructions, guidelines & tips, student photo, show ID, and environment check.

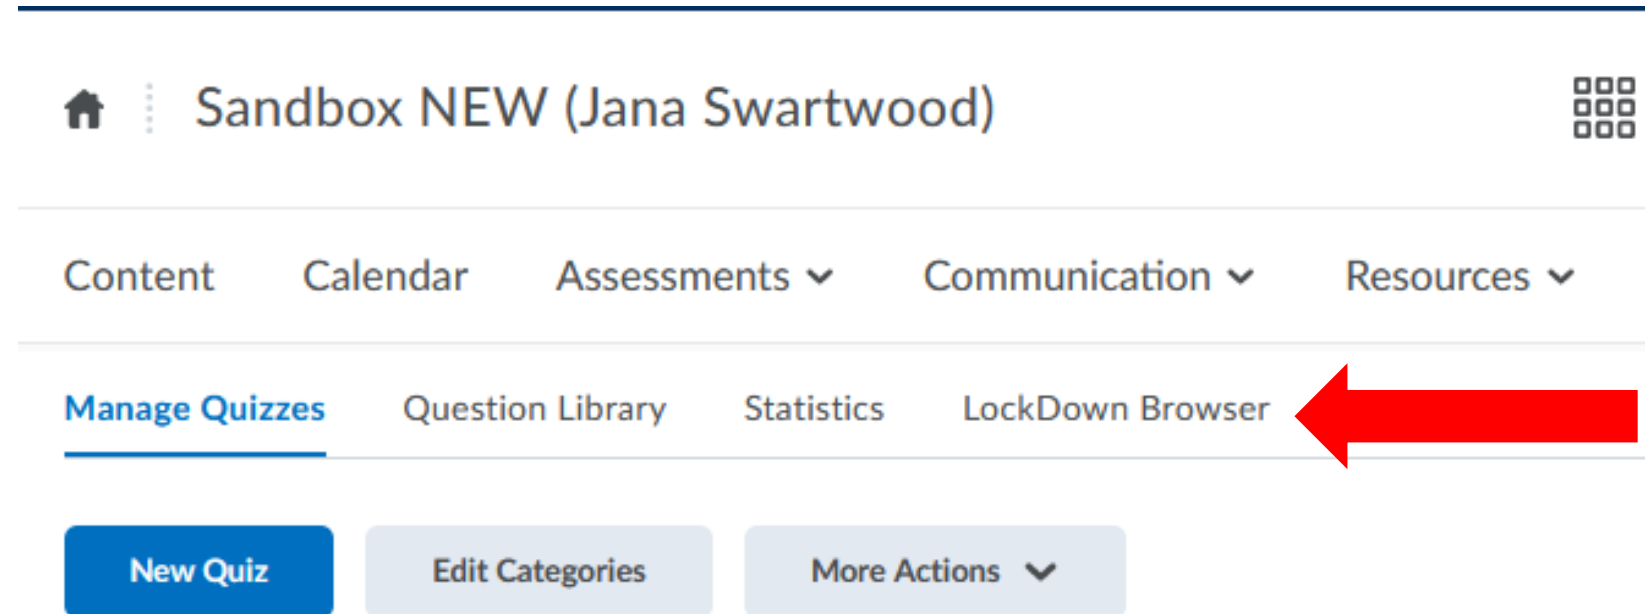

IMPORTANT: Before You Begin

Exam must be created in D2L!

Startup Sequence

The Startup Sequence is the set of optional events that occur before a Monitor webcam session begins. You can choose the items to be included in the Startup Sequence, and can edit the text unless it has been locked by the administrator.

<input checked="" type="checkbox"/> Webcam Check	Preview
<input checked="" type="checkbox"/> Additional Instructions	Preview Edit Text
<input checked="" type="checkbox"/> Guidelines + Tips	Preview
<input checked="" type="checkbox"/> Student Photo	Preview
<input checked="" type="checkbox"/> Show ID	Preview Edit Text
<input checked="" type="checkbox"/> Environment Check	Preview Edit Text
<input checked="" type="checkbox"/> Facial Detection Check	Preview

Facial Detection Options

☒ Prevent students from starting the exam if face cannot be detected during Startup Sequence. [\[explain\]](#)

☒ Notify students **during** the exam if face cannot be detected (prompt for a fix) [\[explain\]](#)

Advanced Settings

How does the optional setting in Respondus Monitor work?

Posted by Respondus Support

With Respondus Monitor, exams can be set up to allow students a choice of taking tests with a webcam and LockDown Browser, or in a proctored environment with LockDown Browser. Here's how it works.

- * Set up your test and require LockDown Browser in the LockDown Browser Dashboard
- * Select the setting, *Either Respondus Monitor or a proctored lab can be used to take this exam*
- * Create a password, or access code
- * Provide the password to the proctor or testing center. Never give the password directly to a student.
- * When a student begins a test with this setting applied, they will see an initial screen (see below) that allows them to select if they have a webcam or if they are at a proctored location.
 - If the student selects to use a webcam, they will then need to complete the Webcam Check and other Startup Sequence items before starting the test.
 - If the student selects a proctored location, they will be prompted for a password. The proctor then enters the password and the student can start the test.

Webcam Check

LockDown Browser

This exam can be taken without a proctor if using a webcam (Respondus Monitor).
Or you can go to a proctored location designated by the instructor.

☒ I want to use a webcam (Respondus Monitor).

☐ I'm at a proctored location
Enter access code here:
